## Content

This document is a readme for the VDMA 66413-Libraries from KEB. In the following table are the different versions of the VDMA 66413-Libraries, this is for checking the actual version. This document is also a short manual, how the library can be integrated.

### Important Note:

The VDMA 66413-Library from KEB is tested and approved with SISTEMA. We do not provide the using by another program with the XML interface, like the programs from Siemens (SET), Pilz (PAScal), EPLAN and ABB Oy (FSDT). For an actual list of VDMA 66413 data and programs with this interface please look on the Homepage of the VDMA.

## FAQ C6 SAFETY

### Validity check

| Lfd. | Manufacturer      | Manufacturer | Manufacturer       | Manufacturer  | VDMA66413  | Validity check |            |
|------|-------------------|--------------|--------------------|---|------------|----------------|------------|
| Nr.  | Name              | Version      | DBFileName         | Information   | CRC32      | From           | To         |
| 1    | KEB Automation KG | 0.1.5        | KEB_LIB_V0.1.5.xml | All Devices with Safety function  | 0xEF566A74 | 15.05.2019     | 01.10.2021 |
| 2    | KEB Automation KG | 0.1.6        | KEB_LIB_V0.1.6.xml | All Devices with Safety function, Safety module 5 is supplemented for F6 and S6 | 0xE259A62E | 01.10.2021     |            |
|      |                   |              |                    |   |            |                |            |

# FAQ C6 SAFETY

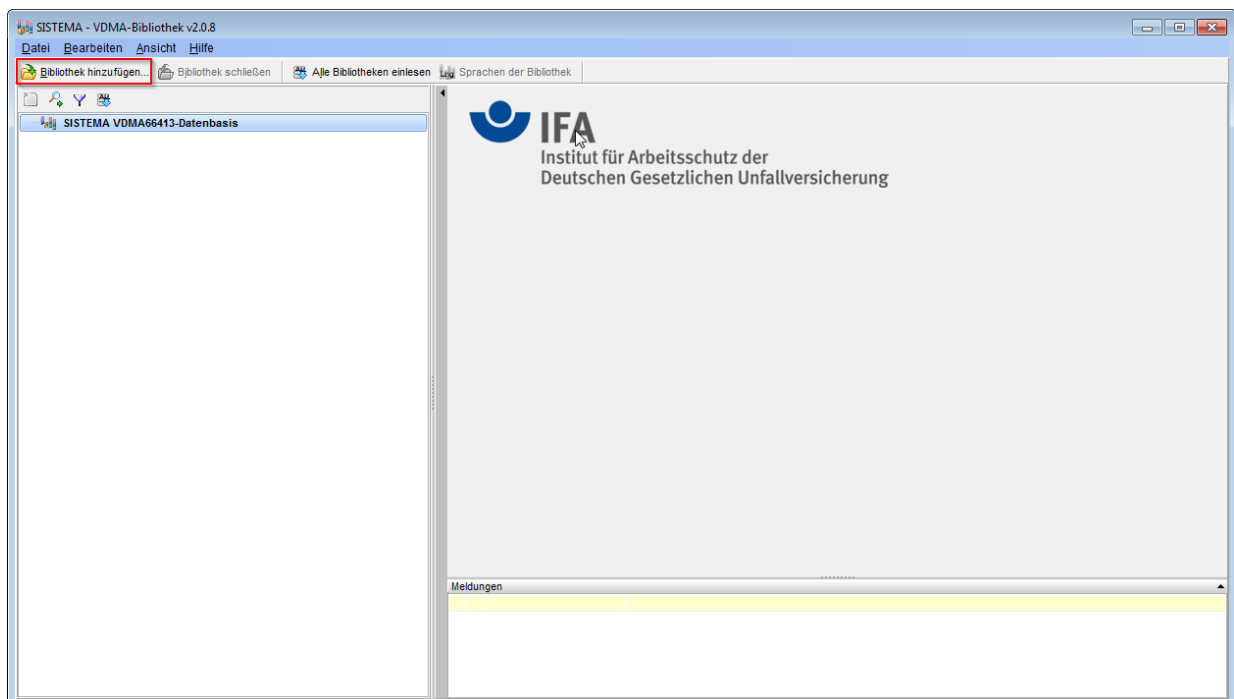

## Integration in SISTEMA

After opening Sistema, there is the window for working on a project. This window organizes the safety functions and which subsystems will be used for the safety function. The subsystems can be established by yourself or for KEB we can integrate the XML file. The XML file is a VDMA library, which can be organized about the button "VDMA Bibliothek" in the top menu bar. See the following figure.

After pressing the button, there is opening a new window only for VDMA Libraries. In this Window we find in the top left-hand corner a button for importing libraries. See the figure.

Now search for the XML file and choose the KEB\_Lib\_V.2.XML.

Then we can find there the data for the safety function in KEB products and can be used in the projects.
