## RELIABLE BRAKES AND CLUTCHES FOR YOUR DRIVE

KEB's success story began over 50 years ago in the field of brakes and clutches, and the safety and reliability of our products have been impressing customers around the world ever since.

In addition to our standard range of safety brakes, safety clutches and corresponding electronic accessories, we work with you to adapt the products to your requirements and needs.

In the process, we manufacture the products in accordance with the valid ISO 9001 quality guidelines and, for our automotive customers, also in accordance with IATF 16949.

# PRODUCT OVERVIEW

## SPRING-APPLIED BRAKES (Power-off safety brakes)

**COMBISTOP 08**  
**Mini brake 0.3 - 2 Nm**  
For dynamic and static applications

from page 6

**COMBISTOP 28**  
**Sealed brake (IP66) 3 - 2,000 Nm**  
For dynamic and static applications with enhanced sealing requirements or tough ambient conditions

from page 8

**COMBISTOP 38**  
**Standard spring-applied brake with modular system 3 - 2,000 Nm**  
For dynamic and static applications with varied standard options

from page 10

**COMBISTOP 38D**  
**Redundant double brake 2x3 - 2x2,000 Nm**  
For dynamic and static applications with the requirement of redundancy respectively double safety

from page 12

**COMBISTOP S1**  
**High performance holding brake 0.5 - 60 Nm**  
Holding brake with emergency stop function especially for servo applications

from page 14

NEW

## PERMANENT MAGNET BRAKES AND CLUTCHES (Power-off brakes and clutches)

### COMBIPERM P1

**Standard permanent magnet brake 0.15 – 194 Nm**

Backlash-free brake for static applications with emergency stop function

from page 18

### COMBIPERM P2

**High performance permanent magnet brake 3 – 75 Nm**

Backlash-free brake with improved emergency stop function and temperatures up to -40°C

from page 20

### COMBIPERM PC

**permanent magnet clutch 1.5 – 120 Nm**

Safety clutch: In case of an emergency the drive and output are coupled

from page 22

## ELEKTROMAGNETIC BRAKES AND CLUTCHES (Power-on brakes and clutches)

### COMBINORM B

**Electromagnetic brake 0.5 – 1,250 Nm**

For precise positioning and reliable holding

from page 24

### COMBINORM C

**Electromagnetic clutch 0.5 – 1,250 Nm**

For simple controlled switching on and off of functional parts in synchronised processes

from page 26

### COMBINORM T

**Electromagnetic tooth clutch 31 – 390 Nm**

For torsional backlash-free and positive transmission of torque

from page 32

## ACCESSORIES AND TOOLS

### COMBITRON 91

**Rectifier up to 720V**

from page 34

### COMBITRON 98

**POWERBOX / fast-acting rectifier up to 94% energy saving**

from page 35

## CUSTOMIZED SOLUTIONS

Individual designs and customized development, testing and production from a single source

from page 36

# COMBISTOP 08 - MINI BRAKE

The COMBISTOP 08 is KEB's mini-series of closed-current spring-applied brakes. This brake solution is characterised by a particularly compact construction, and is designed for small loads.

The 08 can be used as a service brake for dynamic applications, and as a holding brake with an emergency stop function for static applications.

## OPTIONS:

- Manual release
- Flange
- Sealing plug
- CCV - Cold Climate Version down to 40 °C
- Modified braking torque
- Customized voltages
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** SERVO MOTORS | MEDICAL TECHNOLOGY | ROBOTICS AND AUTOMATION | INDUSTRIAL TRUCKS & AGVS  
MATERIAL HANDLING | DOOR AND GATE OPERATORS | E-MOBILITY

1. Flange 2. Friction plate 3. Friction lining 4. Hub 5. Magnet system 6. Manual release

## HIGHLIGHTS

- Two sizes
- Ready to install, adjusted air gap
- Used as a service brake or holding brake
- Iso class B in accordance with VDE 0580
- CSA/CUS-certified
- Designed for S1 operation or 100 % duty cycle
- Standard voltages 24 / 105 / 180 / 205V

SIZE	Reduced torque [Nm]	Rated torque M <sub>2</sub> [Nm]	Increased torque* [Nm]	Standard power P [W]	D [mm]	H [mm]	M [mm]	L [mm]	L <sub>2</sub> [mm]	d <sub>max</sub> [mm]
0B	-	0.3	-	6	40	-	34	23	-	8
00	0.5	1	2	11 - 15	59.5	41	52	29.5	39.7	10

# COMBISTOP 28 – SEALED BRAKE

The brake can be used as a service brake for dynamic applications, and as a holding brake with an emergency stop function for static applications. Thanks to its modular system, the COMBISTOP can be easily assembled according to individual requirements.

Even project solutions for implementing specific requirements that go beyond the standard can be achieved thanks to our in-house development and production.

## OPTIONS:

- Manual release
- Microswitch to monitor performance or wear and tear\*
- Flange / centering flange
- Shaft sealing ring / sealing plug
- CCV - Cold Climate Version down to 40 °C
- Threaded holes on the back for encoder attachment
- Modified braking torque
- Flat design
- Customized voltages
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1
- Corrosion protection class up to C4

\*From size Ø3 upwards

**AREAS OF APPLICATION:** CRANES AND HOISTS | MEDICAL TECHNOLOGY | WIND ENERGY | INDUSTRIAL TRUCKS & AGVS  
MATERIAL HANDLING | AGRICULTURE | MINING AND MUNICIPAL MACHINERY

1. Flange 2. Friction lining 3. Hub 4. Magnet system 5. Micro switch 6. Shaft sealing ring 7. Sealing plug 8. Manual release

## HIGHLIGHTS

- Ten sizes
- Ready to install, adjusted air gap
- Used as a service brake or holding brake
- Up to Iso class H in accordance with VDE 0580
- CSA / CUS-certified
- Protection class up to IP67
- Designed for S1 operation or 100 % duty cycle
- Up to 7 million switching cycles as standard
- Standard voltages 24 / 105 / 180 / 205V

SIZE	Reduced torque [Nm]	Rated torque M <sub>2</sub> [Nm]	Increased torque* [Nm]	Standard power P [W]	D [mm]	H [mm]	M [mm]	L [mm]	d <sub>max</sub> [mm]

# COMBISTOP 38 – STANDARD SPRING-APPLIED BRAKE

The brake can be used both as a service brake for dynamic applications, and as a holding brake with an emergency stop function for static applications. Thanks to its modular system, the COMBISTOP can be easily assembled according to individual requirements in terms of braking torque and varied options.

Even project solutions for implementing specific requirements that go beyond the standard can be achieved thanks to our in-house development and production.

## OPTIONS:

- Manual release
- Microswitch to monitor performance or wear and tear\*
- Flange / friction disc
- Dust protection ring
- Shaft sealing ring / sealing plug
- CCV - Cold Climate Version down to 40 °C
- Threaded holes on the back for encoder attachment
- Modified braking torque
- Flat design
- Customized voltages
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1

\*From size 03 upwards

**AREAS OF APPLICATION:** MATERIAL HANDLING | WIND ENERGY | MEDICAL TECHNOLOGY | ROBOTIC AND AUTOMATION  
INDUSTRIAL TRUCKS & AGVS | CRANES AND HOISTS

1. Dust protection ring 2. Flange 3. Friction disc 4. Friction lining 5. Hub 6. Magnet system  
7. Micro switch 8. Shaft sealing ring 9. Sealing plug 10. Manual release

## HIGHLIGHTS

- Ten sizes
- Ready to install, adjusted air gap
- Used as a service brake or holding brake
- Up to Iso class H in accordance with VDE 0580
- CSA/CUS-certified
- Protection class up to IP54
- Designed for S1 operation or 100 % duty cycle
- Up to 7 million switching cycles as standard
- Standard voltages 24 / 105 / 180 / 205V

SIZE	Reduced torque [Nm]	Rated torque M <sub>2</sub> [Nm]	Increased torque* [Nm]	Standard power P [W]	D [mm]	H [mm]	M [mm]	L [mm]	d <sub>max</sub> [mm]

# COMBISTOP 38D – REDUNDANT DOUBLE BRAKE

The 38D double brake doubles the safety level and covers a range that is prepared for tasks with redundant brake circuits.

The mechanical design with two safety spring-applied brakes, which are completely independent of each other, meets the requirements according to DIN 56950 (BGV C1). The redundant brake system is delivered ready for use and adjusted by KEB.

## OPTIONS:

- Manual release
- Microswitch to monitor performance or wear and tear
- Flange / friction disc
- Dust protection ring
- Shaft sealing ring / sealing plug
- CCV - Cold Climate Version down to 40 °C
- Threaded holes on the back for encoder attachment
- Modified braking torque
- Flat design
- Customized voltages
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** MEDICAL TECHNOLOGY | CRANES AND HOISTS | MATERIAL HANDLING  
AGRICULTURE | MINING AND MUNICIPAL MACHINERY

1. Dust protection ring 2. Flange 3. Friction disc 4. Friction lining 5. Hub 6. Magnet system 7. Shaft sealing ring 8. Sealing plug 9. Manual release

## HIGHLIGHTS

- Ten sizes
- Two redundant brake circuits
- Ready to install, adjusted air gap
- Used as a service brake or holding brake
- Up to Iso class H in accordance with VDE 0580
- CSA/CUS-certified
- Protection class up to IP67
- Designed for S1 operation or 100 % duty cycle
- Up to 7 million switching cycles as standard
- Standard voltages 24 / 105 / 180 / 205V

SIZE	Reduced torque [Nm]	Rated torque M <sub>2</sub> [Nm]*	Increased torque* [Nm]	Standard power P [W]	D [mm]	H [mm]	M [mm]	L [mm]	d <sub>max</sub> [mm]

# COMBISTOP S1 – HIGH PERFORMANCE HOLDING BRAKE

The new S1 high-performance holding brake impresses with a new, patented friction system. This results in a significantly higher braking torque compared to conventional spring-applied brakes.

NEW

Braking torque on par with PM brakes

This is particularly suitable for servo applications with increased safety requirements. Thanks to the plug & play system, this series is also easy to assemble.

*Available on request*

## OPTIONS:

- Felt ring
- CCV – Cold Climate Version down to 40 °C
- Modified braking torque
- Customized voltages
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** SERVO MOTORS | MEDICAL TECHNOLOGY | ROBOTICS AND AUTOMATION | INDUSTRIAL TRUCKS & AGVS  
E-MOBILITY | MATERIAL HANDLING

1. Hub 2. Brake

## HIGHLIGHTS

- Eight sizes
- High permissible emergency stop friction energy
- Stable brake torque
- High temperature resistance
- Ready to install, adjusted air gap
- Used as a service brake or holding brake
- Integrated cable slots
- Up to Iso class H in accordance with VDE 0580
- Designed for S1 operation or 100 % duty cycle
- Standard voltage 24V

SIZE	Rated torque M <sub>2</sub> [Nm]	M <sub>4min120</sub> [Nm]	Standard power P [W]	D [mm]	M* [mm]	L [mm]	d <sub>max</sub> [mm]
01	0.5	0.3	6.1	35	24.5	30	9

# COMBISTOP S1 FLAT – HIGH-PERFORMANCE HOLDING BRAKE

The new S1 flat high-performance holding brake impresses with a new, patented friction system. This results in a significantly higher braking torque compared to conventional spring-applied brakes.

NEW

It couldn't be flatter

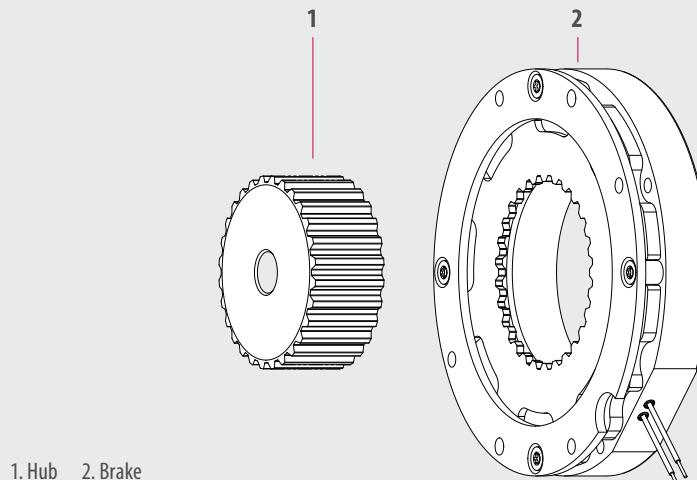

The COMBISTOP S1 Flat fits perfectly with the requirements of AGVs and robotics & automation. Thanks to its plug & play system, this series is also easy to install.

## OPTIONS:

- CCV - Cold Climate Version down to 40 °C
- Modified braking torque
- Customised voltages
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** INDUSTRIAL TRUCKS & AGVS | ROBOTICS AND AUTOMATION | SERVO MOTORS | MEDICAL TECHNOLOGY | E-MOBILITY | MATERIAL HANDLING

1. Hub 2. Brake

## HIGHLIGHTS

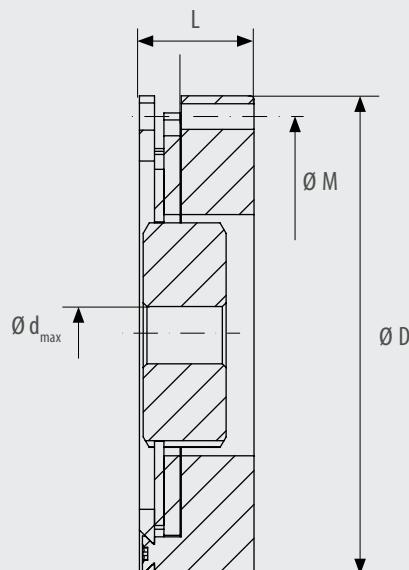

- Two sizes
- High permissible emergency stop friction energy
- Stable brake torque
- High temperature resistance
- Ready to install, adjusted air gap
- Used as a service brake or holding brake
- Integrated cable slots
- Up to Iso class F in accordance with VDE 0580
- Designed for S1 operation or 100 % duty cycle
- Standard voltage 24 V
- Further standard sizes to follow

SIZE	Rated torque $M_2$ [Nm]	$M_{4\text{min}80}$ [Nm]	Standard- power $P$ [W]	$D$ [mm]	$M^*$ [mm]	$L$ [mm]	$d_{\text{max}}$ [mm]

# COMBIPERM P1 – STANDARD PERMANENT MAGNET BRAKE

The COMBIPERM P1 is a powerful permanent magnet brake with a frictionally engaged, backlash-free effect. In the energised state, the magnetic field of the permanent magnet is cancelled and the connected component can rotate without residual torque. In the event of an emergency stop or if the power is switched off, the safety brake engages, brakes and holds the drive safely in position.

Thanks to the short switching times and the compact design, these brakes are ideal for servo motors and the medical industry.

## OPTIONS:

- VdS- monitoring
- Cable protection plate
- Felt ring
- Customized flange
- Customized voltage
- Customized plug
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** SERVO MOTORS | MEDICAL TECHNOLOGY | ROBOTIC AND AUTOMATION | INDUSTRIAL TRUCKS & AGV'S  
ELECTROMOBILITY | INTRALOGISTICS

Download 3D models here and view further technical data

1. Armature version 30 2. Armature version 20 3. Armature version 10 4. Magnet

## HIGHLIGHTS

- Eleven sizes
- Backlash free
- Frictional engagement
- Release without residual torque
- ISO class F in accordance with VDE 0580
- CSA/CUS certification
- Designed for S1 operation or 100% duty cycle
- Up to ten million switching cycles as standard
- Up to 10,000 rpm
- Standard voltage 24V

# COMBIPERM P2 – HIGH-PERFORMANCE PERMANENT MAGNET BRAKE

The COMBIPERM P2 is a very compact and powerful permanent magnet brake with frictionally engaged, backlash-free action.

Compared to the COMBIPERM P1, the brake is smaller in the installation space and requires less power with increased performance. In addition, due to its design, it can be used down to -40°C.

NEW

Braking torque at the highest level

## OPTIONS:

- Cable-protection
- Customized flange and hub
- Customised storage recess
- Customized bolt circle
- Customized plugs
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** SERVO MOTORS | MEDICAL TECHNOLOGY | ROBOTIC AND AUTOMATION | INDUSTRIAL TRUCKS & AGV'S  
ELECTROMOBILITY | INTRALOGISTICS

1. Cable protection   2. Armature   3. Magnet

## HIGHLIGHTS

- Eight sizes
- Backlash free
- Frictional engagement
- Release without residual torque
- ISO class F in accordance with VDE 0580
- Designed for S1 operation or 100% duty cycle
- Up to ten million switching cycles as standard
- Up to 10,000 rpm
- Felt ring integrated
- Operation temperature -40°C - 120°C
- Standard voltage 24V

## COMBIPERM PC – PERMANENT MAGNET CLUTCH

Our COMBIPERM PC is a permanent magnet clutch that transmits torque frictionally when de-energised. High torques can thus be reliably transmitted in a small installation space.

The frictional connection is opened by applying a voltage so that the force effect of the permanent magnets is eliminated.

### OPTIONS:

- Customized flange
- Customized plugs
- Connector assembly
- Certificate 2.1 / acceptance test certificate 3.1

**AREAS OF APPLICATION:** MEDICAL TECHNOLOGY | WOOD WORKING MACHINES | ELECTROMOBILITY | INTRALOGISTICS  
PLASTIC TECHNOLOGY | PACKAGING MACHINES AND FOOD TECHNOLOGY

1. Armature version 30 2. Armature version 10 3. Rotor 4. Magnet

### HIGHLIGHTS

- Seven sizes
- Frictional engagement
- ISO class F in accordance with VDE 0580
- Designed for S1 operation or 100% duty cycle
- Standard voltage 24V

# COMBINORM B – ELECTROMAGNETIC BRAKE

The operating current brake COMBINORM B opens when the power supply is switched off or in the event of a power failure. The electromagnetic brake is particularly suitable for precise positioning and reliable holding.

It is also used in safety and access technology, e.g. in the area of access barriers or fire doors. The electromagnetic brake is designed for a 100 % duty cycle and can optionally be certified to VdS. The electromagnetic brake has a torque range of 0.5 to 500 Nm.

## OPTIONS:

- Customized flange
- CSA / CUS Certification
- Customized voltage
- Customized plug
- Certificate 2.1 / acceptance test certificate 3.1
- Anti-remanence
- Interlocking toothed version for torque increase

**AREAS OF APPLICATION:** MEDICAL TECHNOLOGY | DOOR AND GATE OPERATOR | WOOD WORKING MACHINES

ELECTROMOBILITY | ROBOTIC AND AUTOMATION | PACKAGING MACHINES AND FOOD TECHNOLOGY

AGRAR- MINING- AND MUNICIPAL MACHINERY

1. Armature version 30 2. Armature version 20 3. Armature version 10 4. Magnet flange mounted 5. Armature shaft mounted 6. Magnet shaft mounted

## HIGHLIGHTS

- Thirteen sizes
- Short switching times
- Positioning accuracy and functional reliability
- Designed for S1 operation or 100% duty cycle
- ISO class B in accordance with VDE 0580
- Wide temperature and voltage range
- Continuously adjustable torque
- Standard voltage 24V

## COMBINORM C – ELECTROMAGNETIC CLUTCH

The operating current clutch COMBINORM C provides clutch engagement when electrically powered. As a result it enables particularly simple controlled switching on and off of functional parts.

The electromagnetic clutch is suitable for reliable positioning and torque transmission of switchable shaft connections in synchronised processes. The electromagnetic clutch has a torque range of 0.5 to 500 Nm.

### OPTIONS:

## SHAFT OR FLANGE MOUNTED VERSION WITH ELASTIC CLUTCH:

Shaft-mounted  
(Size 08-12)

Flange-mounted  
(Size 06-07)

1. Elastic clutch 2. Armature 3. Rotor 4. Magnet (shaft-mounted size 08-12) 5. Magnet (flange-mounted size 06-07) 6. Bearing

## COMBINORM T – ELECTROMAGNETIC TOOTH CLUTCH

Like the COMBINORM C, the operating current clutch COMBINORM T engages when electrically powered. However, this device is designed as an electromagnetically operated tooth clutch. Through the positive connection, particularly large torques are transmitted in both directions within a small space by restricting the speed of incidence.

In the process, torque is applied by the leading faces of hardened serrations and is backlash-free. The electromagnetic tooth clutch has a torque range of 21 to 390 Nm.

### OPTIONS:

- Customized flange
- CSA / CUS certificate
- Customized voltage
- Customized plugs
- Factory certificate 2.1 / inspection certificate 3.1

**AREAS OF APPLICATION:** MEDICAL TECHNOLOGY | DOOR AND GATE OPERATOR | WOOD WORKING MACHINES  
PACKAGING MACHINES AND FOOD TECHNOLOGY | INTRALOGISTICS

1. Armature version 30 2. Hub version 10 3. Rotor 4. Magnet

### HIGHLIGHTS

- Five sizes
- Backlash free
- Iso class B accordance with VDE 0580
- Designed for S1 operation or 100% duty cycle
- Wide temperature and voltage range
- Standard voltage 24V

SIZE	Rated torque M <sub>2</sub> [Nm]	Standard power P [W]	D [mm]	M [mm]	L [mm]	L <sub>2</sub> [mm]	L <sub>3</sub> [mm]	d <sub>max Rotor</sub> [mm]	d <sub>max Hub</sub>

## COMBITRON 91 – RECTIFIER

COMBITRON 91 rectifiers are half-wave or bridge rectifiers for supplying electromagnets with a supply voltage of up to max. 720 V AC for DC or AC side switching in accordance with the 73/231/EEC Low Voltage Directive.

When switching electromagnetic clutches and brakes and other inductive DC consumers, harmful electromagnetic interference can occur.

Our half-wave rectifier with interference suppression limits the interference to class A in accordance with EN 55011.

Input voltage	max. Input voltage	max. Cut-off voltage	Switching mode	Nominal voltage magnet [V DC]*	Type of rectifier
$U_{in}$ [V AC]	$U_{in\ max}$ [V AC]	[V]			
48	275	450	Half wave	20	0291010-CE07
			Full wave	42	0291020-CE07
110	275	450	Full wave	105	0291020-CE07
220 / 230	275	450	Half wave	105	0291010 - CE07
			Full wave	205	0291020 - CE07
			Half wave with EMC protection	105	0291010 - CEMV
380 / 400	500	900	Half wave	180	0491010 - CE07
			Full wave	380	0491020 - CE07
380 / 400	600	1000	Half wave	on request	0591010 - CE09
600 / 690	720	1600	Half wave	on request	0691010 - CE09

\* Half-wave rectifier:  $0,45*U_{in}$       Full wave:  $0,9*U_{in}$

Download 3D models here and view further technical data

### HIGHLIGHTS

- Half-wave or bridge rectifier
- Up to 720 V
- UL-certified
- Compact design in plastic housing
- DC-side and AC-side switching

With the COMBITRON 98, KEB offers a fast-acting rectifier with overexcitation for optimum activation or deactivation times for spring-applied brakes and electromagnets. Two powerbox designs in rigid housing for fitting on DIN rails or as a screw-on version complete the range.

The advantages of COMBITRON 98 become clear in practice, as faster switching times and the possibility of achieving significant energy savings make the fast-acting rectifier a highly sought-after "assistant".

	9098210 - CE04	9098200 - CE09 <sup>1)</sup>
Input voltage	24 V DC $\pm$ 20%	180-300 V AC $\pm$ 0%
Overexcitation time	800 ms $\pm$ 15%	350 ms $\pm$ 10%
Current $I_N$ 45°C	1.2 A continuous 7 A für 800 ms	1.2 A continuous 2.4 A für 350 ms
Current $I_N$ 75°C	0.6 A continuous 3.5 A für 800 ms	0.7 A continuous 1.4 A für 350 ms
Temperature	CCV -40° ... 75°	CCV -40° ... 75°
Switching rate	max. 6 per minute at max. current	max. 1 per minute at max. current

<sup>1)</sup>different values (U, A) when used under conditions of UL

Download 3D models here and view further technical data

## HIGHLIGHTS

- Two versions
- Up to 94 % power reduction
- Overexcitation possibility
- Up to 300 V
- UL-certified
- Compact design in plastic housing
- Low level of intrinsic heating
- DC-side and AC-side switching

# CUSTOMISED BRAKES AND CLUTCHES

## IF THE STANDARD VERSION DOES NOT DO WHAT YOU NEED, WE CAN DEVELOP A SOLUTION FOR YOU

Implementing customer-specific product solutions is one of KEB Automation's core competencies thanks to decades of experience, in-depth expertise and a high level of in-house vertical integration.

We work in partnership with you to develop high-quality, customised solutions in the area of spring-applied brakes, permanent magnet brakes and clutches, as well as electromagnetic clutches and brakes. By individually analysing your requirements and needs, we design the right product for your application.

### EXAMPLE MODIFICATIONS SPRING-APPLIED BRAKES

- Multi-surface and double rotor brakes
- Lockable hand release
- Customised brake torque tolerances
- Customised sizes/dimensions
- Bistable solutions for saving energy

Double brake with additional single surface brake

Spring-applied brake with lockable hand release

Bistable spring applied brake for energy saving

### HIGHLIGHTS

- 90 % in-house production possibility at KEB
- Magnetic flux simulation
- Strength analysis
- 3D rapid prototyping
- 100 % torque testing possible

## EXAMPLE MODIFICATIONS PERMANENT MAGNET BRAKES

- Plug-and-play solutions
- Individual external dimensions and intermediate sizes
- Adapted temperature range
- Automated air gap adjustment
- Redundant coil and bistable brake solutions

Plug&Play Permanent Magnet brake

Floating supported permanent magnet brake

Individual intermediate size

## EXAMPLE MODIFICATIONS ELECTROMAGNETIC BRAKES AND CLUTCHES

- Complete mounting units
- Integrated bearing
- Multipole solution for increased torque
- Anti-remanence function
- Narrow torque window

Plug&Play unit for the automotive Sector

Holding magnet with spring plates

Toothed power brake

## RELIABLE, SAFE AND ECONOMICAL

Electricity and magnetism cannot be separated from each other. Electromagnetism is considered one of the four elemental forces, through which one of the most important power transmissions in modern drive technology is available.

KEB uses this force sensibly and purposefully. Switching machine segments on and off, safely stopping and holding loads or dynamic positioning...

Electromagnetic assemblies offer the designer economical, robust, safe and reliable options for the individual solution.

### THE MAIN APPLICATIONS ARE:

- Gear and servo motors
- Medical technology
- Robotics and automation
- Cranes, hoists and trolleys
- Intralogistics
- Wind energy
